SUMMARY

Computer Science undergraduate with strong foundations in Software Engineering, Data Structures and Algorithms, Object-Oriented Programming, and Computer Networks. Experienced in designing and building scalable software applications using Python, C++, SQL, REST APIs, and Streamlit. Passionate about backend development, distributed systems, and solving real-world engineering problems through clean, efficient, and maintainable software.

EDUCATION

2023 – 2027	Bachelor of Technology (Computer Science and Business Systems) Noida Institute of Engineering and Technology (NIET), Greater Noida	CGPA: 8.9/10
2023	Class XII (CBSE)	86%
2021	Class X (CBSE)	89%

EXPERIENCE

Infosys Springboard – Internship 6.0 Dec 2025 – Feb 2026

- Designed and implemented backend modules using Python and SQL for AI-driven financial applications.
- Developed REST API integrations and optimized database workflows for efficient query processing.
- Applied modular software design, debugging, testing, and performance optimization to improve application reliability.
- Collaborated throughout the software development lifecycle by performing debugging, testing, and implementing clean coding practices.

PROJECTS

AI-Powered Stock Screener and Advisory Platform (LLM + Streamlit + SQL) [GitHub](#)

- Built a natural language interface that translated investment queries into optimized SQL operations for intelligent stock screening.
- Designed a scalable backend architecture integrating LLMs, REST APIs, and financial datasets for real-time recommendations.
- Optimized query execution and backend workflows to improve application responsiveness and scalability.

Diabetic Retinopathy Detection using Deep Learning [GitHub](#) | [Live Demo](#)

- Developed a deep learning application using Python, TensorFlow, and Keras for multi-class retinal disease classification.
- Implemented image preprocessing, augmentation, and model optimization, achieving 76% classification accuracy.
- Designed and deployed an end-to-end inference pipeline using Streamlit.
- Improved software reliability through modular implementation, testing, and debugging.

CERTIFICATIONS

- **Design Thinking for Innovation** – University of Virginia
- **Databases and SQL for Data Science with Python** – IBM
- **Machine Learning for All** – University of London

SKILLS

Languages	Python, C++, SQL
Core CS	Data Structures and Algorithms, OOP, Operating Systems, DBMS, Computer Networks
Software	REST APIs, SDLC, Debugging, Unit Testing, Git, GitHub
AI/ML	TensorFlow, Keras, Streamlit, Pandas, NumPy, NLP, Computer Vision, LLMs
Soft Skills	Leadership, Communication, Collaboration, Problem Solving

CO-CURRICULAR & ACHIEVEMENTS

- Solved 450+ Data Structures and Algorithms problems on LeetCode.
- Rank Holder in FireDucks Blogathon.
- Developed and deployed multiple end-to-end software and AI applications.
